PROFESSIONAL SUMMARY

Backend and Data Engineer specializing in Python, FastAPI, and data pipeline automation with strong foundations in cloud platforms and GenAI orchestration. Experienced in building high-performance RESTful APIs, optimizing enterprise workflows, and engineering scalable database layers using SQL and PostgreSQL. Proven track record at GlobalLogic and IBM SkillsBuild of deploying production-ready services, maintaining data integrity, and automating manual processes.

TECHNICAL SKILLS

Backend & APIs: Python (FastAPI, Flask), RESTful APIs, Microservices Architecture, Node.js, Express.js
Data & Databases: SQL (PostgreSQL, MySQL), MongoDB, Query Optimization, Data Processing Pipelines
Cloud & DevOps: Oracle Cloud Infrastructure (OCI), Render, Docker Basics, Git/GitHub, Linux/Bash, .env Security
GenAI & Core: LLM Orchestration, Structured Data Parsing, Streamlit, Pandas, NumPy, System Design

PROFESSIONAL EXPERIENCE

GlobalLogic

Associate Analyst Intern

Gurugram, India

Apr 2026 – May 2026

- Workflow Automation:** Developed custom Python scripts to parse, extract, and clean unstructured enterprise datasets, saving approximately 15 hours of repetitive manual effort each week.
- Deployment Collaboration:** Worked alongside senior backend teams to troubleshoot execution anomalies and adapt pipeline logic for deployment standards.

Edunet Foundation (AICTE – IBM SkillsBuild)

Backend & Cloud Intern

Remote, India

Sep 2025 – Oct 2025

- Engine Architecture:** Architected a Flask-based automated resume generation engine that transforms dynamic user payloads into ATS-compliant PDFs in under 2 seconds.
- API Design & Security:** Implemented modular RESTful routes with strict environment configuration handling (.env) to prevent credential leaks and configuration faults.
- Query Optimization:** Engineered backend queries and structured data models, speeding data retrieval and delivery to client services by 30%.

TECHNICAL PROJECTS

Motion Controlled Pong Game | JavaScript, HTML5 Canvas, Computer Vision Algorithms

- Mathematical Boundary Logic:** Programmed precise multi-dimensional collision detection and coordinate tracking systems using linear algebra and matrix logic.
- Real-Time State Engineering:** Built custom algorithmic state management architectures to evaluate rapid, real-time data inputs and dynamic runtime behaviors.

Automated AI Resume Builder & Copilot | Python, Flask, SQL, HTML/CSS

- Server-Side Processing:** Engineered modular backend endpoints using Flask to parse user JSON payloads and convert them into standardized documents dynamically.
- Data Schema Modeling:** Designed relational schemas to manage user profiles and generation history, ensuring complete consistency across active sessions.
- Pipeline Deployment:** Configured automated deployment pipelines on cloud hosting with zero environment misconfiguration defects.

EDUCATION

Meerut Institute of Engineering and Technology (MIET)

Master of Computer Applications (MCA) – CGPA: 8.08

Meerut, India

Graduation: 2026

- First Runner-Up, Inter-Department Project Exhibition (Expo).

Chaudhary Charan Singh University

Bachelor of Computer Applications (BCA) – Grade: A (76.3%)

Meerut, India

Graduation: 2024

CERTIFICATIONS

OCI AI Foundations Badge – Oracle Cloud Infrastructure

AI Fundamentals – IBM (Credential ID: PLAN-8A48645196FA)

Python Basic to Advanced – Scaler Solutions

Software Engineering Job Simulation – Accenture Nordics
